

SELECT JPEG/HEIF

Choose whether pictures are recorded in JPEG or HEIF.

Option	Description
JPEG	Pictures are recorded in the widely-supported JPEG format.
HEIF	Pictures are recorded in HEIF, a format with excellent compression but limited options for viewing and sharing.

-  **JPEG** is automatically selected in place of **HEIF** during multiple-exposure photography.
- Selecting **HEIF** disables **CLARITY** and sets **COLOR SPACE** to **sRGB**.
- HEIF pictures are stored on the memory card as files with the extension ".HIF". Before the pictures can be viewed on a computer, the extension must be changed to ".HEIC". This occurs automatically when HEIF pictures are uploaded from the camera to a computer via USB.
