

USB POWER SUPPLY SETTING

Choose whether power is supplied to the camera when it is connected to a computer or other device via a USB cable.

Option	Description
ON	The camera draws power from the connected device, reducing the drain on the camera battery.
OFF	The camera does not draw power from the connected device.

 The camera cannot draw power from Lightning connections or from devices that do not supply power. Select **OFF** before connecting the camera to such devices. The connection may not be available for data transfer or the like when **ON** is selected.

-  • The term “draw power” is used when the connected device supplies power to the camera.
- Regardless of the option chosen, the battery will charge while the camera is off.
