

3 Check the shooting mode.

Confirm that **P** appears in the display.

4 Ready the camera.

- Hold the camera steady with both hands and brace your elbows against your sides. Shaking or unsteady hands can blur your shots.

- To prevent pictures that are out of focus or too dark (underexposed), keep your fingers and other objects away from the lens and AF-assist illuminator.

5 Frame the picture.

 The bright frame in the OVF shows the area that will appear in the final photograph.
