

The Eye Cup

To remove the eye cup, hold the buttons on either side and slide eye cup up.

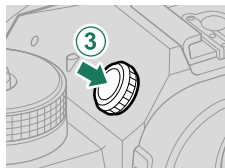

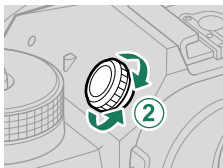

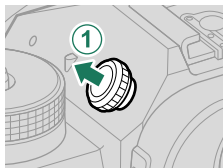

Focusing the Viewfinder

If the indicators displayed in the viewfinder are blurred, put your eye to the viewfinder and rotate the diopter adjustment control until the display is in sharp focus.

To focus the viewfinder:

- ① Lift the diopter adjustment control.
- ② Rotate the control to adjust viewfinder focus.
- ③ Return the control to its original position and lock it in place.

 Lift the control before use. Failure to observe this precaution could cause product malfunction.
