

- **FOCUS PEAK HIGHLIGHT:** Highlights high-contrast outlines. Rotate the focus ring until the subject is highlighted.

- **FOCUS METER:** A meter is displayed below the focus point indicating whether focus is in front of or behind the subject. The needle swings left when focus is in front of the subject and right when it is behind the subject. Adjust focus so the needle is pointing straight up.

 The display reverses when  **CCW** is selected for  **BUTTON/DIAL SETTING > FOCUS RING.**

- **FOCUS MAP:** Square indicators are displayed in focus frames to indicate points that are in focus and not in focus by color. A green indicator is displayed on a point in focus on the subject and a point the same distance as the subject. A yellow indicator is displayed on a point in front of the focus position, and a blue indicator is displayed on a point behind the focus position.

- You can change the indicator colors to monochrome using  **AF/MF SETTING >  MF ASSIST** in the movie menus. With this setting, a white indicator is displayed on a point in front of the focus position, and a black indicator is displayed on a point behind the focus position.
- Indicators may not be displayed for subjects that are difficult to capture with auto focus (📖 99).
