

Bracketing

Automatically vary settings over a series of pictures.

- 1 Press the **DRIVE/DELETE** button and select the desired bracketing option in the drive-mode menu.

- 2 Take photographs.

ISO BKT

Select a bracketing amount ($\pm 1/3$, $\pm 2/3$, or ± 1) in the drive mode display. Each time the shutter is released, the camera will take a picture at the current sensitivity and process it to create two additional copies, one with sensitivity raised and the other with sensitivity lowered by the selected amount.

WB WHITE BALANCE BKT

Select a bracketing amount (± 1 , ± 2 , or ± 3) in the drive mode display. Each time the shutter is released, the camera takes one shot and processes it to create three copies: one at the current white balanced setting, one with fine-tuning increased by the selected amount, and another with fine-tuning decreased by the selected amount.
