

Connecting via USB

The camera can be connected to computers and smart-phones via USB.

Connecting to Computers

 Before downloading pictures or taking pictures remotely, connect the camera to a computer and check that it functions normally.

- 1 Turn the computer on.
- 2 Adjust settings according to whether you will be copying pictures to a computer (📖 280), save RAW pictures in other formats (📖 284), or Saving and Loading Camera Settings (📖 284).
- 3 Turn the camera off.
- 4 Connect a USB cable.

USB connector (Type-C)

 The USB cable must be no more than 1.5 m (4.9 ft.) long and be suitable for data transfer.
