

## AUTOROTATE PB

Choose **ON** to automatically rotate “tall” (portrait-orientation) pictures during playback.

Options	
<b>ON</b>	<b>OFF</b>

## FOCUS SCALE UNITS

Choose the units used for the focus distance indicator.

Options	
<b>METERS</b>	<b>FEET</b>

## APERTURE UNIT FOR CINEMA LENS

Choose whether the camera displays aperture as a T-number (used for movie camera lenses) or an f/-number (used for still camera lenses) when an optional FUJINON MKX-series lens is attached. For information on using cinema lenses, see the documentation provided with the lens.

Option	Description
<b>T NUMBER</b>	A measure of lens aperture commonly used by cinematographers. Lens transmittance is taken into account to better calculate exposure.
<b>F NUMBER</b>	A measure of lens aperture commonly used by photographers. Lens transmittance is assumed to be 100%, meaning that the same aperture may produce different exposures depending on the lens.
