

PERIPHERAL LIGHT CORRECTION

Select **ON** to enable peripheral illumination correction during movie recording.

Options	
ON	OFF
 <ul style="list-style-type: none"> If ON is selected when a lens that does not transmit data to the camera is attached using a FUJIFILM M MOUNT ADAPTER (available separately), peripheral illumination will be adjusted according to the option selected for  IMAGE QUALITY SETTING >   MOUNT ADAPTER SETTING > PERIPHERAL ILLUMINATION CORRECTION in the shooting menu (📖 124). Select OFF if you notice banding in movies recorded using this option. 	

MOUNT ADAPTER SETTING

This item is also found in the photo menus (📖 123). Changes to one apply to the other.
