

Setting	Description
② Flash compensation/output	<p>The options available vary with flash control mode.</p> <ul style="list-style-type: none"> <li>• <b>TTL:</b> Adjust flash compensation (the full value may not be applied if the limits of the flash control system are exceeded). In the cases of the EF-X20 and EF-X500, the selected value is added to the value selected with the flash unit.</li> <li>• <b>M/MULTI:</b> Adjust flash output (compatible units only). Choose from values expressed as fractions of full power, from 1/4 (mode <b>M</b>) or 1/4 (<b>MULTI</b>) down to 1/512 in increments equivalent to 1/3 EV. The desired results may not be achieved at low values if they exceed the limits of the flash control system; take a test shot and check the results.</li> </ul>
③ Flash mode (TTL)	<p>Choose a flash mode for TTL flash control. The options available vary with the shooting mode (<b>P</b>, <b>S</b>, <b>A</b>, or <b>M</b>) selected.</p> <ul style="list-style-type: none"> <li>• <b> TTL (FLASH AUTO):</b> The flash fires only as required; flash level is adjusted according to subject brightness. A  icon displayed when the shutter button is pressed halfway indicates that the flash will fire when the photo is taken.</li> <li>• <b> TTL (STANDARD):</b> The flash fires with every shot if possible; flash level is adjusted according to subject brightness. The flash will not fire if not fully charged when the shutter is released.</li> <li>• <b> TTL SLOW (SLOW SYNC.):</b> Combine the flash with slow shutter speeds when photographing portrait subjects against a backdrop of night scenery. The flash will not fire if not fully charged when the shutter is released.</li> </ul>
④ Sync	<p>Control flash timing.</p> <ul style="list-style-type: none"> <li>• <b> FRONT (1ST CURTAIN):</b> The flash fires immediately after the shutter opens (generally the best choice).</li> <li>• <b> REAR (2ND CURTAIN):</b> The flash fires immediately before the shutter closes.</li> </ul>
