

COOLING FAN SETTING

Adjust settings for optional cooling fans ( 416).

| Option | Description |
|--------------|--|
| AUTO1 | The fan turns on automatically as required when camera temperature rises and runs at slow speed. |
| AUTO2 | The fan turns on automatically as required when camera temperature rises and runs at high speed. The increased fan noise may be audible in movies. |
| LOW | Run the fan continuously at low speed. |
| HIGH | Run the fan continuously at high speed. The increased fan noise may be audible in movies. |
| OFF | Turn the fan off. |

WIRELESS COMMUNICATION

Connect to smartphones running the latest version of apps. The smartphone can then be used to:

- Control the camera and take pictures remotely
- Receive pictures uploaded from the camera
- Browse the pictures on the camera and download selected pictures
- Upload location data to the camera
