

Other Controls

Focus and exposure can also be locked using the **AEL** and **AFON** buttons. At default settings, you can use the **AEL** button to lock exposure without locking focus. If the **AFON** button is assigned **AF LOCK ONLY**, it can similarly be used to lock focus without locking exposure.

AEL button
(exposure lock)

- While the assigned control is pressed, pressing the shutter button halfway will not end the lock.
- If **AE&AF ON/OFF SWITCH** is selected for **■ BUTTON/DIAL SETTING > AE/AF-LOCK MODE**, the lock can only be ended by pressing the control a second time.

AFON button

- The focus lever (focus stick) can be used to reposition the focus point during exposure lock.
- The **AEL** and **AFON** buttons can be assigned other roles using **■ BUTTON/DIAL SETTING > FUNCTION (Fn) SETTING**. Exposure and focus lock can also be assigned to other buttons (📖 321).
