

MULTI EXPOSURE

Choose how the camera combines shots to create a multiple exposure.

Option	Description
ON	<p>Adjust multiple exposure settings and record multiple exposures.</p> <ul style="list-style-type: none"> • ADDITIVE: The camera adds the exposures together. You may need to lower exposure compensation depending on the number of shots. • AVERAGE: The camera automatically optimizes exposure for the final picture. The background in series shot without changing the composition will be optimally exposed. • BRIGHT: The camera compares the exposures and chooses only the brightest pixel at each location. Colors may be mixed depending on their brightness and hue. • DARK: The camera compares the exposures and chooses only the darkest pixel at each location. Colors may be mixed depending on their brightness and hue.
OFF	Multiple exposure mode disabled.

The camera can combine up to nine exposures.
