

## FOCUS BKT SETTING

Choose from **AUTO** and **MANUAL** focus bracketing modes.

- **MANUAL:** In **MANUAL** mode, you choose the following.

Option	Description
<b>FRAMES</b>	Choose the number of shots.
<b>STEP</b>	Choose the amount focus changes with each shot.
<b>INTERVAL</b>	Choose the interval between shots.

### Focus and FRAMES/STEP

The relation between focus and the options chosen for **FRAMES** and **STEP** is shown in the illustration.

- Focus proceeds from the starting position toward infinity.
- Small **STEP** values translate to small changes in focus, larger values to larger changes.
- Regardless of the option chosen for **FRAMES**, shooting ends when focus reaches infinity.
