

## P, S, A, and M Modes

P, S, A, and M modes give you varying degrees of control over shutter speed and aperture.

### Mode P: Program AE

Let the camera choose shutter speed and aperture for optimal exposure. Other values that produce the same exposure can be selected with program shift.

|                 | Setting  |
|-----------------|----------|
| ① Shutter speed | A (auto) |
| ② Aperture      | A (auto) |

Confirm that **P** appears in the display.

**!** If the subject is outside the metering range of the camera, the aperture display will show “— — —”.
