

## HIGH SPEED REC

Record high-frame-rate movies. High-frame-rate movies can be played back in slow motion, giving you time to view fast-moving subjects or details too fleeting for the naked eye. Select **ON** to choose the recording and playback rates separately.

 Choose **ON HDMI ONLY** to record footage only to external recorders connected via HDMI. Note that this option does not support playback frame-rate selection.

### Frame Size

Options	
 <b>16:9</b>	 <b>17:9</b>

### Recording

Options	
<b>100P</b>	<b>120P</b>

### Playback

Options					
<b>23.98P</b>	<b>24P</b>	<b>25P</b>	<b>29.97P</b>	<b>50P</b>	<b>59.94P</b>

-  High-speed movies are recorded with no sound.
- The footage recorded to the memory card is compressed with the goal of maintaining the selected bit rate.
- The options available for playback rate vary with the option selected for rate of recording.
