

HIGH SPEED REC

Record high-frame-rate movies. High-frame-rate movies can be played back in slow motion, giving you time to view fast-moving subjects or details too fleeting for the naked eye. Select **ON** to choose the recording and playback rates separately.

 Choose **ON HDMI ONLY** to record footage only to external recorders connected via HDMI. Note that this option does not support playback frame-rate selection.

Frame Size

Options	
 16:9	 17:9

Recording

Options			
100P	120P	200P	240P

Playback

Options					
23.98P	24P	25P	29.97P	50P	59.94P

-  High-speed movies are recorded with no sound.
- The footage recorded to the memory card is compressed with the goal of maintaining the selected bit rate.
- The options available for playback rate vary with the option selected for rate of recording.
