

## External Flash Units

Use optional external flash units for flash photography. Some units support high-speed sync (FP) and can be used at shutter speeds faster than the flash sync speed, while others can function as commanders controlling remote units via optical wireless flash control.

You may be unable to test-fire the flash in some circumstances, for example when a setup menu is displayed on the camera.

### Red-Eye Removal

Red-eye removal is available when an option other than **OFF** is selected for **[F] FLASH SETTING > RED EYE REMOVAL** and **[AF] AF/MF SETTING > FACE/EYE DETECTION SETTING** is **FACE DETECTION ON**. Red-eye removal minimizes “red-eye” caused when light from the flash is reflected from the subject’s retinas.
