

Time (T)

Choose a shutter speed of **T** (time) for long time-exposures. Use of a tripod is recommended to prevent the camera moving during the exposure.

- 1 Set shutter speed to **T**.

- 2 Rotate the rear command dial to choose a shutter speed.

- 3 Press the shutter button all the way down to take a picture at the selected shutter speed. At speeds of 1 s or slower, a count-down timer will be displayed while the exposure is in progress.

To reduce “noise” (mottling) in long time-exposures, select **ON** for **IMAGE QUALITY SETTING > LONG EXPOSURE NR.** Note that this may increase the time needed to record images after shooting.
