

Taking Photographs (Mode P)

This section describes how to take pictures using program AE (mode P). See pages 72–81 for information on **S**, **A**, and **M** modes.

- 1 Rotate the **STILL/MOVIE** mode dial to **STILL**.

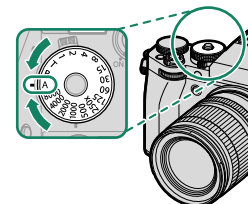

- 2 Slide the lens aperture mode switch to **A**.

- 3 Rotate the shutter speed dial to **A**.

! To use the shutter speed dial, press the dial lock release and rotate the dial to the desired setting.

P will appear in the display.
