

FOCUS BKT

Each time the shutter button is pressed, the camera takes a series of photos, varying focus with each shot. The **SHOOTING SETTING > FOCUS BKT SETTING** item offers a choice of **MANUAL** and **AUTO** bracketing.

- Do not adjust zoom during shooting.
- Use of a tripod is recommended.

MANUAL

In **MANUAL** mode, you choose the following.

Option	Description
FRAMES	Choose the number of shots.
STEP	Choose the amount focus changes with each shot.
INTERVAL	Choose the interval between shots.

AUTO

In **AUTO** mode, the camera calculates **FRAMES** and **STEP** automatically.

- 1 Select **SHOOTING SETTING** in the shooting menu, highlight **FOCUS BKT SETTING**, and press **MENU/OK**.
- 2 Select **AUTO** and choose an **INTERVAL**.
The view through the lens will be displayed.
- 3 Focus on the nearest end of the subject and press **MENU/OK**.
The selected focus distance appears as **A** on the focus distance indicator.

The same focus range can be chosen by focusing on the farthest end of the subject first.
