

## MF ASSIST

Choose how focus is displayed in manual focus mode (📖 94).

Option	Description
<b>DIGITAL SPLIT IMAGE</b>	Displays a black-and-white ( <b>MONOCHROME</b> ) or color ( <b>COLOR</b> ) split image in the center of the frame. Frame the subject in the split-image area and rotate the focus ring until the four parts of the split image are correctly aligned.
<b>DIGITAL MICROPRISM</b>	A grid pattern that emphasizes blur is displayed when the subject is out of focus, disappearing to be replaced by a sharp image when the subject is in focus.
<b>FOCUS PEAK HIGHLIGHT</b>	The camera heightens high-contrast outlines. Choose a color and peaking level.
<b>OFF</b>	Focus is displayed normally (focus peaking, digital split image, and digital microprism are not available).

## FOCUS CHECK

If **ON** is selected, the display will automatically zoom in on the selected focus area when the focus ring is rotated in manual focus mode.

Options	
ON	OFF
 <ul style="list-style-type: none"><li>Pressing the center of the rear command dial cancels focus zoom.</li><li>The zoom position is centered on the current focus area and changes when the focus area is changed.</li></ul>
