

IMAGE QUALITY SETTING (Movie Recording)

Adjust image quality settings for movies.

To display image quality settings, press MENU/OK in the movie shooting display and select the (IMAGE QUALITY SETTING) tab.

The options available vary with the shooting mode selected.

FILM SIMULATION

Options are the same as those for still photography, but settings must be adjusted separately (122).

MONOCHROMATIC COLOR

Options are the same as those for still photography, but settings must be adjusted separately (124).
