## **IS MODE**

Turn image stabilization on or off.

Option	Description
IBIS/OIS	Enable in-body (IBIS) and optical (OIS) image stabilization.
	IBIS is used with lenses that do not support OIS.
IBIS/OIS + DIS	Enable in-body (IBIS), optical (OIS), and digital (DIS) image
	stabilization. The crop is adjusted according to the option
	selected for <b>MOVIE MODE</b> .
OFF	Image stabilization off; 🌑 appears in the display.

- The setting selected with the lens image stabilization switch, if any, takes priority over the setting chosen with the IS mode.
  - Note that vibration or camera sounds may be noticeable as image stabilization takes effect

## 🞥 IS MODE BOOST

Choose the image stabilization level.

Option	Description
ON	Suitable for hand-held shooting with no panning.
OFF	Suitable for hand-held shooting with panning.

Assigning **IS MODE BOOST** to a function button allows the image stabilization level to be changed while recording is in progress (\$\equiv 321\$).
