## MONOCHROMATIC COLOR

Add a reddish or bluish tinge (warm or cool color cast) to the ACROS and MONOCHROME monochrome film simulations. Color can be adjusted on the WARM-COOL and G (Green)-M (Magenta) axes.

## **GRAIN EFFECT**

Add a film grain effect.

## ROUGHNESS

Option	Description
STRONG	Choose for rougher grains.
WEAK	Choose for smoother grains.
OFF	Turn the effect off.

## SIZE

Option	Description
LARGE	Choose for coarser grains.
SMALL	Choose for finer grains.
