## Focus Zoom

If ON is selected for MAF/MF SETTING > FOCUS CHECK, the camera will automatically zoom in on the selected focus area when the focus ring is rotated. Press the center of the rear command dial to exit zoom

- Use the focus stick (focus lever) to choose another focus area.
  - Zoom can be adjusted by rotating the rear command dial. Zoom cannot, however, be adjusted when **DIGITAL SPLIT IMAGE** or **DIGITAL MICROPRISM** is selected for MF assist.

## MF Assist

Use **MAF/MF SETTING** > **MF ASSIST** (■ 156) in the photo menus or MAF/MF SETTING > MR ASSIST (□ 208) in the movie menus to choose a focus check option.

The focus check options for movies differ from those for still photography.

- **DIGITAL SPLIT IMAGE**: Displays a split image in the center of the frame. Frame the subject in the split-image area and rotate the focus ring until the four parts of the split image are correctly aligned.
- DIGITAL MICROPRISM: A grid pattern that emphasizes blur is displayed when the subject is out of focus, disappearing to be replaced by a sharp image when the subject is in focus.
