## COMMAND DIAL SETTING

Choose the roles played by the front command dial. You can press the center of the dial to cycle through roles in the order **FRONT COMMAND DIAL 1**, **FRONT COMMAND DIAL 2**, and **FRONT COMMAND DIAL 3**.

| Option | Description |
|---|---|
| **FRONT COMMAND DIAL 1** | Assign shutter speed (**S.S. (PROGRAM SHIFT)**) or aperture (**APERTURE**)[1] to **FRONT COMMAND DIAL 1**. |
| **FRONT COMMAND DIAL 2** | Assign shutter speed (**S.S. (PROGRAM SHIFT)**), aperture (**APERTURE**)[1], exposure compensation (**EXPOSURE COMPENSATION**)[2], sensitivity (**ISO**), or no role (**NONE**) to **FRONT COMMAND DIAL 2** or **FRONT COMMAND DIAL 3**. |
| **FRONT COMMAND DIAL 3** | |

1 Aperture set to **A** (auto) and lens equipped with aperture ring or **COMMAND** selected for **B BUTTON/DIAL SETTING** > **APERTURE RING SETTING (A)**.
2 Exposure compensation dial rotated to **C**.

N **COMMAND DIAL SETTING** can also be accessed by pressing and holding the center of the front command dial.
