FLICKERLESS S.S. SETTING

Select **ON** to allow shutter speed to be fine-tuned to reduce flicker caused by LED lighting and the like.

Options	
ON	**OFF**

N This option takes effect only in modes **S** and **M**.

IS MODE

Turn image stabilization on or off.

Option	Description
CONTINUOUS	Image stabilization on.
SHOOTING ONLY	Image stabilization enabled only when the shutter button is pressed halfway (focus mode **C**) or the shutter is released.
OFF	Image stabilization off; (淞) appears in the display.

N • The setting selected with the lens image stabilization switch, if any, takes priority over the setting chosen with **IS MODE**.
• Note that vibration or camera sounds may be noticeable as image stabilization takes effect.
