**4** Select **COMM SETTING**.

> • To rename the connection setting profile, select **EDIT CONNECTION SETTING NAME**.
> • If the chosen connection setting profile is for FTP upload, select **FTP SERVER SETTING** to view or edit settings for connection to the FTP server (📖 285).
> • If the chosen connection setting profile is for the remote record function, select **REMOTE REC FUNCTOIN SETTING** to view or edit settings for remote movie recording (📖 296, 301).

5 Choose an existing communication setting profile.

> To create a new profile, select **CREATE NEW**.

6 Select **EDIT/CHECK**.
- To save the selected communication setting profile to the current connection setting profile, choose **SELECT**.

- To copy an existing communication setting profile, select **COPY**. Choosing an existing profile as the destination overwrites the profile selected in Step 5.
- To delete the selected communication setting profile, select **ERASE**. Deleting a communication setting profile saved to a connection setting profile also deletes the connection setting profile.
- To test the connection, select **CONNECTION TEST**.
