TTL-LOCK MODE

Instead of adjusting flash level with each shot, TTL flash control can be locked for consistent results across a series of photographs.

Option	Description
LOCK WITH LAST FLASH	Flash output is locked at the value metered for the most recent photo.
LOCK WITH METERING FLASH	The camera emits a series of pre-flashes and locks flash output at the metered value.

N • To use TTL lock, assign **TTL-LOCK** to a camera control and then use the control to enable or disable TTL lock (🖹 385).
  • Flash compensation can be adjusted while TTL lock is in effect.
  • Selecting **LOCK WITH LAST FLASH** displays an error message if no previously metered value exists.
