RED EYE REMOVAL

Remove red-eye from portraits. The camera will analyze the image; if red-eye is detected, the image will be processed to create a copy with reduced red-eye.

1 Display the desired picture.

2 Select **RED EYE REMOVAL** in the playback menu.

3 Press **MENU/OK**.

- **N** • Results vary depending on the scene and the camera's success in detecting faces.
  - The amount of time needed to process the image varies with the number of faces detected.
  - Red eye cannot be removed from pictures that have already been processed using red-eye removal, which are indicated by a ⊚ icon during playback.
  - Red eye removal cannot be performed on RAW images.
