Mode A: Aperture-Priority AE
Choose an aperture and let the camera adjust shutter speed for optimal exposure.

Setting	
① **Shutter speed**	**A** (auto)
② **Aperture**	User-selected

Confirm that **A** appears in the display.

⚠️ • If the correct exposure cannot be achieved at the selected aperture, shutter speed will be displayed in red.
  • If the subject is outside the metering range of the camera, the shutter speed display will show "– – –".

◆ • If the lens is equipped with a aperture ring, aperture can be adjusted by rotating the ring. If you are using a lens without an aperture ring, press the center of the front command dial to cycle to **APERTURE** and then rotate the dial to choose a value.
  • Front command dial settings can be adjusted using **B BUTTON/ DIAL SETTING** > **COMMAND DIAL SETTING** (📖 67, 226).
  • Aperture can be adjusted even while the shutter button is pressed halfway.
