## Time (T)

Choose a shutter speed of **T** (time) for long time-exposures. Use of a tripod is recommended to prevent the camera moving during the exposure.

1 Set shutter speed to **T**.

2 Rotate the front command dial to choose a shutter speed.

3 Press the shutter button all the way down to take a picture at the selected shutter speed. At speeds of 1 s or slower, a count-down timer will be displayed while the exposure is in progress.

- To reduce "noise" (mottling) in long time-exposures, select **ON** for **IMAGE QUALITY SETTING** > **LONG EXPOSURE NR**. Note that this may increase the time needed to record images after shooting.
- Front command dial settings can be adjusted using **BUTTON/ DIAL SETTING** > **COMMAND DIAL SETTING** (📖 67, 226).
