Connecting the Camera and Computer
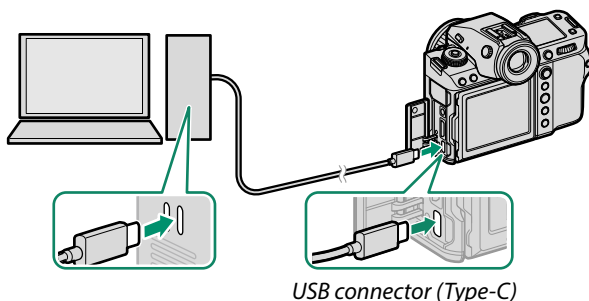

1 Select either **AUTO** or **POWER SUPPLY OFF/COMM ON** for **USB POWER SUPPLY/COMM SETTING** in the network/USB setting menu.

2 Choose **2: USB CARD READER** for **SELECT CONNECTION SETTING**.

3 Turn the camera off.

4 Turn the computer on.

5 Connect a USB cable.

USB connector (Type-C)

 The USB cable must be no more than 1 m (3.3 ft.) long and be suitable for data transfer.

6 Turn the camera on.

7 Copy pictures to your computer.
  • **Mac OS X/OS X/macOS**: Pictures can be copied to your computer using Image Capture (supplied with your computer) or other software. Use a card reader to copy files over 4 GB in size.
  • **Windows**: Pictures can be copied to your computer using apps supplied with the operating system.
