Sensitivity

Adjust the camera's sensitivity to light.

Set sensitivity using **A SHOOTING SETTING** > **ISO**.

Option	Description
AUTO1 **AUTO2** **AUTO3**	Sensitivity is automatically adjusted in response to shooting conditions. Different values for **DEFAULT SENSITIVITY**, **MAX. SENSITIVITY**, and **MIN. SHUTTER SPEED** can be chosen for each of **AUTO1**, **AUTO2**, and **AUTO3** (目 83).
160–12800	Adjust sensitivity manually. Selected value is shown in display.
L (80) **L (100)** **L (125)** **H (25600)** **H (51200)**	Choose for special situations. Note that mottling may appear in pictures taken at **H**, while **L** reduces dynamic range.

- Sensitivity is not reset when the camera is turned off.
  - A **B MOVIE SETTING** > **ISO** option is available in the movie shooting menu when **Y** (movie) is selected for drive mode.
  - Sensitivity can be assigned to the front command dial using **C BUTTON/DIAL SETTING** > **COMMAND DIAL SETTING** (目 226).

Adjusting Sensitivity

High values can be used to reduce blur when lighting is poor, while lower values allow slower shutter speeds or wider apertures in bright light; note, however, that mottling may appear in pictures taken at high sensitivities.
